

INCIDENT MANAGEMENT SITUATION REPORT
FRIDAY AUGUST 13, 2004 – 0530 MDT
NATIONAL PREPAREDNESS LEVEL 3

CURRENT SITUATION:

Initial attack activity was moderate in the Northern California, Southern California, Eastern Great Basin and Western Great Basin Areas and light elsewhere. Nationally, 196 new fires were reported. Five new large fires were reported, two in the Southern California Area and one each in the Northwest, Southwest and Northern Rockies Areas. Two large fires were contained, one each in the Western Great Basin and Southern California Areas. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Idaho, Montana, Nevada, Oregon, Utah, Washington and Wyoming.

NORTHWEST AREA LARGE FIRES:

MUD LAKE, Washington Department of Natural Resources, Southeast. A Washington State Interagency Incident Management Team (Berndt/Andring) is assigned. This fire is seven miles northwest of Naches, WA in grass, brush and timber. Hot, dry and windy conditions resulted in very active fire behavior with a significant run, spotting and group torching.

POT PEAK/SISI RIDGE COMPLEX, Okanogan-Wenatchee National Forest. A Washington State Interagency Incident Management Team (Furlong/Gormley) is assigned. This complex, comprised of the Pot Peak, SiSi Ridge and Deep Harbor fires is 15 miles northwest of Chelan, WA in timber. Fire activity increased on all fires with short runs, torching and crowning reported.

FISCHER, Okanogan-Wenatchee National Forest. A Washington State Interagency Incident Management Team (Reed/Holloway) is assigned. A Type 1 Incident Management Team (Anderson) has been ordered. This fire is four miles southeast of Leavenworth, WA in grass, brush and timber. Spotting over control lines was reported on the north end of the fire. Evacuation orders are in effect for Williams and Derby Canyons.

MEBEE PASS, Okanogan-Wenatchee National Forest. A Washington State Interagency Incident Management Team (Jennings/Perry) is assigned; the Team is also managing the Freezeout fire. This fire is 30 miles northwest of Winthrop, WA in timber. Active fire behavior was observed.

FREEZEOUT, Okanogan-Wenatchee National Forest. A Washington State Interagency Incident Management Team (Jennings/Perry) is assigned. This fire is 65 miles northeast of Bellingham, WA in timber. A joint U.S. Forest Service/British Columbia Forest Service helibase has been established in Manning Park, Canada to support air operations. The north flank of the incident reported active fire behavior with a high percentage of fuel consumption.

MILE MARKER 44, Bureau of Indian Affairs, Yakima Agency. This fire is 18 miles south of Toppenish, WA in grass and scattered trees. Active fire behavior was observed.

RATTLESNAKE PEAK, Okanogan-Wenatchee National Forest. A Fire Use Management Team (Weldon) is assigned. This lightning-caused Wildland Fire Use (WFU) incident, located 40 miles west of Yakima, WA in timber, is being managed to accomplish resource objectives. Fire activity increased with torching and moderate rates of spread through ground fuels. Crews are preparing for a burnout operation.

ALASKA AREA LARGE FIRES:

CENTRAL COMPLEX, Bureau of Land Management, Upper Yukon Zone. A transfer of command from a Type 2 Incident Management Team (Morcom) to a Type 1 Incident Management Team (Frye) will occur today. This complex, comprised of the Crazy, Bolgen Creek and Wolf Creek fires, is surrounding Central, AK in spruce and hardwoods. Decreased relative humidity levels resulted in increased fire behavior. Burnout operations were completed for the area north of Central.

TAYLOR HIGHWAY COMPLEX, Alaska Division of Forestry, Tok Area Forestry. A Type 2 Incident Management Team (Jandt) is assigned. This complex, comprised of the Billy Creek, Gardiner Creek, Chicken and Porcupine fires, is 35 miles northwest of Tok, AK in black spruce and tundra. All fires within the complex were active.

BOUNDARY, Alaska Division of Forestry, Fairbanks Area Forestry. This fire is 20 miles northeast of Fairbanks, AK in black spruce and tundra. Fire activity was low due to cooler temperatures and higher relative humidity levels.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD

NORTHERN CALIFORNIA AREA LARGE FIRES:

BEAR, California Department of Forestry & Fire Protection (CDF), Shasta-Trinity Unit. A Type 1 Incident Management Team (Chuchel) is assigned. This fire is ten miles northeast of Redding, CA in grass and brush. Significant runs were reported on the east side of the fire. Evacuations are in effect for several areas.

OREGON, California Department of Forestry & Fire Protection (CDF), Butte Unit. This fire is seven miles northeast of Oroville, CA in oak woodland. Torching and long range spotting were reported. Crews successfully completed burnout operations on the south flank.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD

OREGON	CA	BTU	1,000	50	8/13	564	9	110	7	16	474K

EASTERN GREAT BASIN AREA LARGE FIRES:

MIDDLE RIDGE, Bureau of Land Management, Cedar City Field Office. This fire is located 34 miles northwest of St. George, UT in pinyon pine and juniper. Extreme fire behavior with significant runs was caused by a passing thunderstorm. Reduction in acreage is due to more accurate mapping.

SALT CREEK, Bureau of Land Management, Richfield Field Office. This fire is nine miles south of Levan, UT in pinyon pine, sagebrush and grass. Creeping and isolated torching were reported. Local road closure remains in effect.

PORTER, Salmon-Challis National Forest. A Fire Use Management Team (Cones) has been ordered. This lightning-caused Wildland Fire Use (WFU) incident, located 25 miles northwest of Stanley, ID in timber, is being managed to accomplish resource objectives. Spotting up to one-quarter mile and crowning were observed.

SOUTHERN CALIFORNIA AREA LARGE FIRES:

EARLY, Stanislaus National Forest. A Type 2 Incident Management Team (Rios) is assigned. This fire is located 15 miles northeast of Groveland, CA in brush and timber. Minimal fire behavior was reported.

HUNT, California Department of Forestry & Fire Protection (CDF), Tuolumne-Calaveras Unit. This fire is five miles northeast of Copperopolis, CA in brush, grass and oak woodland. No further information was received.

DEEP, Sequoia National Forest. This fire is 18 miles northeast of Porterville, CA in chaparral. Very active fire behavior with spotting and rapid rates of spread was observed. Evacuations of residences in the communities of Upper and Lower Coffee Camp, Wishon drainage and Dole Springs are in effect. A closure of State Highway 190 is also in effect.

BDF = San Bernardino National Forest

SOUTHWEST AREA LARGE FIRES:

PITCHFORK, Gila National Forest. This fire is 21 miles southeast of Reserve, NM in timber, logging slash and grass. Creeping and torching with flame lengths up to six feet were reported.

HUMBOLDT, Tonto National Forest. This fire is 12 miles northeast of Carefree, AZ in chaparral, hardwood slash and grass. Backing fire with short runs was reported.

CAMP 36, Kaibab National Forest. This lightning-caused Wildland Fire Use (WFU) incident, located nine miles southwest of Desert View, AZ in ponderosa pine and oak, is being managed to accomplish resource objectives. No new information was reported. This will be the last narrative report unless significant activity occurs.

EASTERN AREA LARGE FIRES:

SECTION 33, Voyageurs National Park. A Fire Use Management Team (Bird) is assigned. This lightning-caused Wildland Fire Use (WFU) incident, located 25 miles southeast of International Falls, MN in balsam, spruce and pine, is being managed to accomplish resource objectives. Precipitation resulted in minimal fire behavior.

ELD = Bureau of Land Management, Ely Field Office

OUTLOOK:

Red Flag Warning: Southwest Idaho and southwest Utah for dry lightning.

Fire Weather Watch: Portions of interior Alaska for strong winds; portions of northern and northeastern Nevada for dry lightning.

Weather Discussion: Thunderstorms will develop along the Sierra, in the Great Basin and in the Northwest today as monsoonal moisture is drawn up from the south. Some of the thunderstorms are expected to be dry today, especially in northern Nevada and southern Utah. Very warm and dry conditions will be in place over the Northern Rockies. In Alaska, conditions will be windy and dry early. However, a frontal system will provide some light rainfall overnight tonight in east-central sections of the state. In the Gulf of Mexico, Charley will continue to strengthen and is expected to move over the Florida Keys and onto the Florida west coast today.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
NORTHWEST AREA Mostly sunny. A slight chance of afternoon thunderstorms in southeast and Central Oregon, including the Oregon Cascades.	West of the Cascades: 80s north. Near 100 south. Mid 60s to lower 70s coast. East of the Cascades: Upper 80s to 102.	West of the Cascades: 15 to 25% Cascades and southwest interior. 60% coastal strip. 25 to 40% elsewhere. East of the Cascades: 9 to 19% most areas.	Northwest to north 10 to 20 mph along the coastal strip. Mainly west to northwest 5 to 10 mph inland.
ALASKA AREA Eastern Interior: Cloudy with rain spreading east.	Eastern Interior: 60s to 70s.	Eastern Interior: 34 to 44%.	Eastern Interior: Southwest 10 to 25 mph.
NORTHERN CALIFORNIA AREA Partly cloudy with a 30% chance of thunderstorms north and east of the Sacramento Valley; a 10% chance elsewhere.	60s coast. 80s to 90s higher elevations. 90s to 105 inland valleys.	5 to 15% eastern areas. 40% or higher coast. 12 to 25% elsewhere.	Southeast to southwest 4 to 12 mph with local afternoon gusts to 22 mph.
EASTERN GREAT BASIN AREA Idaho, Bridger-Teton: Partly cloudy. Widely scattered dry thunderstorms southwest Idaho south of Snake River. Utah, Arizona Strip: Partly cloudy. Widely scattered to scattered dry thunderstorms south, mainly southwest Utah.	Idaho, Bridger-Teton: 80 to 90 mountains. 66 to 81 western Wyoming mountains. 90 to 104 valleys. Utah and Arizona Strip: 78 to 92 mountains. 92 to 104 lower elevations. 102 to 109 Lake Mead.	Idaho, Bridger-Teton: 13 to 30% mountains. 9 to 17% valleys. Utah, Arizona Strip: 15 to 25% mountains. 8 to 15% valleys.	Idaho, Bridger-Teton: Upslope/upvalley 6 to 10 mph Idaho mountains. West to northwest 6 to 10 mph remainder of Idaho and western Wyoming mountains. Utah, Arizona Strip: Upslope/upvalley 5 to 10 mph. Gusty near thunderstorms.
SOUTHERN CALIFORNIA AREA Areas of morning low clouds and fog coastal basins. Otherwise, partly cloudy with a few thunderstorms over the Sierra as well as over the mountains and deserts of Southern California with a slight chance central coastal mountains.	65 to 80 coastal areas. 80 to 95 mountains. 85 to 95 valleys. 90 to 100 upper deserts. 100 to 110 lower deserts.	25 to 40% valleys. 20 to 35% mountains. 15 to 30% deserts.	Southwest to northwest 5 to 15 mph.
WESTERN GREAT BASIN AREA Dry lightning possible in northern Nevada; showers and wet thunderstorms elsewhere.	86 to 96 north valleys. 93 to 103 south valleys. 71 to 86 mountains.	10 to 20% valleys. 20 to 30% mountains.	South to west at 5 to 15 mph with localized gusts near storms to 40 mph.

<p>NORTHERN ROCKIES AREA Partly cloudy in North Dakota. In Idaho and Montana, mostly sunny.</p>	<p>West of Continental Divide: 94 to 104 Idaho. 88 to 98 elsewhere. East of Continental Divide: 70s North Dakota. 65 to 75 mountains. 80s elsewhere.</p>	<p>West of Continental Divide: 8 to 15% Idaho. 9 to 16% elsewhere. East of Continental Divide: 35 to 45% North Dakota. 14 to 18% elsewhere.</p>	<p>West of Continental Divide: Valley 5 to 10 mph. East of Continental Divide: Generally, southeast to northeast at 5 to 10 mph. In North Dakota, northeast at 5 mph.</p>
<p>ROCKY MOUNTAIN AREA Isolated thunderstorms over southern Front Range of Colorado and eastern Kansas.</p>	<p>Upper 70s to 80s. 70s mountains.</p>	<p>Less than 15% across western Colorado and southwestern Wyoming.</p>	<p>Variable at 8 to 18 mph.</p>

PROPER USE OF TRIGGER POINTS

Accurate situational awareness (SA) requires constant reassessment of conditions (existing or potential) that may impact the safety and effectiveness of firefighters. Keeping an eye out for the 18-Watchout Situations and establishing operational/environmental limits (“trigger points”) ahead of time can help to focus SA, prompt reassessment and help you re-evaluate the risk of current actions. The following items are things to consider in your planning and discussion. Remember, trigger points are NOT decision makers, but serve as predetermined cues to prompt you to re-evaluate the situation and associated risks and help you to determine and implement the proper course of action.

- Preplan! Don't wait until you're in the wrong place at the wrong time---with no time.

- Trigger points should be based on measurable factors such as:
 - RH
 - Winds
 - Fire Behavior
 - Topographical boundaries
 - Time constraints/Time of day
 - Time/distance to safety zones
 - Loss of support resources (air tankers, helicopters, etc.)
 - Other operational considerations (e.g., firefighter fatigue, loss of lookouts or communication, etc.)

- As you approach predetermined trigger points, go through the Risk Management Process to help you decide if a change in tactics is appropriate. (See the Incident Response Pocket Guide)
 - Gather information to assure good Situational Awareness
 - Assess hazards to anticipate serious risks
 - Establish hazard controls to mitigate serious risks
 - Make decisions based on your ability to mitigate those serious risks
 - Evaluate effectiveness of current actions

- Command/Leadership responsibilities when changing tactics
 - Communicate the changes to your subordinates, as well as to adjacent forces and up the chain of command
 - Account for all your people
 - Make sure everyone knows and follows the new plan
